

Synthetic measurement - page 1

This public fixture tests complete scientific transcription across two pages.

COLUMN 1A

Observations are recorded before interpretation. Each sample keeps its name, quantity, sign and decimal precision.

COLUMN 1B

Independent readings follow the left column. A complete page preserves every table cell and the terminal marker.

Equation: $y = 3x + 7$; $x = 5$; $y = 22$

Sample	Mass (g)	Count	Value
Alpha	12.50	17	203.25
Beta	7.25	29	118.75
Total	19.75	46	322.00

END-CLI-PAGE-1-COMPLETE

Synthetic measurement - page 2

This public fixture tests complete scientific transcription across two pages.

COLUMN 2A

Observations are recorded before interpretation. Each sample keeps its name, quantity, sign and decimal precision.

COLUMN 2B

Independent readings follow the left column. A complete page preserves every table cell and the terminal marker.

Equation: $z = 2a - 1$; $a = 4$; $z = 7$

Trial	Offset	Rate	Result
Gamma	-2.50	0.125	16.00
Delta	+3.75	1.250	27.50
Total	1.25	1.375	43.50
